

Extinguishing Media: Foam, dry powder or carbon dioxide. Firefighters should wear self-contained breathing apparatus.

UEL: Not applicable

Autoignition Temperature: Not applicable

Hazardous Combustion Products: COx

Explosion data - sensitivity to mechanical impact: No

- sensitivity to static discharge: No

-----  
Section V Reactivity Data  
-----

Conditions of instability: Normally stable

Conditions of reactivity: Normally stable

Hazardous decomposition products: COx  
-----

Section VI Toxicological Properties / Health Hazard Data  
-----

-skin contact: May irritate

-skin absorption: No information available

-eye contact: May irritate

-inhalation: May be harmful

-ingestion: May be harmful

LC50: Not available

Exposure Limits: TLV : 1 mg/m<sup>3</sup> (oxalic acid)

Effects of Acute Exposure: No information available

Effects of Chronic Exposure: No information available

Irritancy: No experimental information available

Sensitization to Product: No information available

Carcinogenicity: No information available

Reproductive Toxicity: No information available

Teratogenicity: No information available

Mutagenicity: No information available

Toxicologically Synergistic Products: None found  
-----

Section VII First aid measures

-----  
Skin: Flush the contact area with lukewarm running water for at least 15 minutes. Remove contaminated clothing, taking care not to spread the chemical.

If contamination is extensive, remove clothing under running water. Discard or decontaminate clothing under running water. Discard or decontaminate clothing

before use. Unless contact has been slight, seek medical attention. Seek medical attention if irritation persists.

Eye: Flush the contaminated eye(s) for at least 15 minutes with lukewarm running water, holding the eyelids open. Take care not to rinse contaminated water into the non-affected eye. Always seek medical attention for accidents

Inhalation: Take proper precautions to ensure your own safety before attempting rescue. Remove source of contamination or move victim to fresh air. If breathing has stopped, trained personnel should begin artificial respiration, or if the heart has stopped, cardiopulmonary resuscitation (CPR) immediately. Seek medical attention.

Ingestion: Never give anything by mouth if victim is rapidly losing consciousness, or is unconscious or convulsing. Rinse mouth thoroughly with water. Do not induce vomiting. Have victim drink 200-400 ml of water to dilute. If breathing has stopped, trained personnel should begin artificial respiration, or if the heart has stopped, cardiopulmonary resuscitation (CPR) immediately. Seek medical attention.

-----  
Section VIII Preventive Measures  
-----

Engineering Controls: Engineering control methods to reduce hazardous exposures are preferred. Methods include mechanical ventilation (dilution and local exhaust), process or personnel enclosure, control of process conditions, and process modification. Administrative controls and personal protective equipment may also be required.

-gloves: Rubber or plastic

-respiratory protection: Dust mask or fumehood as appropriate

-eye protection: Chemical safety goggles

-clothing: Plastic apron, sleeves and boots as appropriate

Storage Requirements: Store in suitable labelled containers. Keep containers tightly closed when not in use and when empty. Protect from damage. Store in a cool, dry, well-ventilated area, out of direct sunlight.

Handling Procedures and Equipment: Avoid generating dust. Follow routine safe

Leak or Spill Clean-up: Before dealing with spillages take necessary protective measures, inform others to keep at a safe distance and, for flammable materials, shut off all possible sources of ignition. Transfer carefully into container and arrange removal by disposal company. Wash site of spillage thoroughly with water and detergent.

Disposal: Follow all federal, provincial and local regulations for disposal. Use only licensed disposal and waste hauling companies. Disposal of small amounts of spilled material may be handled as described under "Leak or Spill Cleanup". Large spills must be dealt with separately and must be handled by qualified disposal companies.

Special Shipping Information: Follow all TDG regulations and see classification in Section I
