Section 1. Chemical Product and Company Identification

Product Name: MICROFAB® CU-300 ADDITIVE
Product Code Number(s): 250816
250817-001
Material Uses: Specialty chemicals for the electronics and surface finishing industries.
Manufacturer: ENTHONE
350 Frontage Road
West Haven, CT 06516
(203) 799-4917
(203) 799-8179 (fax)
www.cooksonelectronics.com

All ingredients comply with applicable rules or orders under TSCA

Section 3. Hazards Identification

Physical State and Appearance: Liquid.

Odor: Acidic.

Color: Colorless.

Emergency Overview: DANGER!
May be fatal if swallowed. May cause burns to mouth, throat and stomach.

Routes of Entry: Dermal contact. Eye contact. Inhalation. Ingestion.

Potential Acute Health Effects

**Eyes**: Very hazardous in case of eye contact (corrosive). Inflammation of the eye is characterized by redness, watering, and itching.

**Skin**: Very hazardous in case of skin contact (corrosive). Skin contact may produce burns. Skin inflammation is characterized by itching, scaling, reddening, or, occasionally, blistering.

**Inhalation**: Very hazardous in case of inhalation (lung corrosive). Inhalation of the spray mist may produce severe irritation of respiratory tract, characterized by coughing, choking, or shortness of breath.

**Ingestion**: May be fatal if swallowed. May cause burns to mouth, throat and stomach.

Medical Conditions Caused or Aggravated by Overexposure

Prolonged contact with skin, eyes, or respiratory tract may result in burns or tissue damage due to corrosive effects. Repeated or prolonged skin contact can cause drying and cracking of the skin (dermatitis).
Section 4. First Aid Measures

Eye Contact
Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be used. Get medical attention immediately.

Skin Contact
In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately.

Inhalation
If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

Ingestion
If swallowed, do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

Section 5. Fire Fighting Measures

Flammability of the Product
Non-flammable.

Flash Points
Not applicable.

Products of Combustion
This material is not combustible, however in a fire it may give off sulfur oxides (SO2, SO3...)

Fire Fighting Media
Use DRY chemicals, CO2, water spray or foam.

Protective Equipment (Fire)
Wear NIOSH approved self-contained breathing apparatus or equivalent and full protective gear.

Unusual Firefighting Hazards
May react with amphoteric metals (such as aluminum, zinc, tin) generating hydrogen gas which will burn or explode if ignited.

Section 6. Accidental Release Measures

Small Spill and Leak
Absorb with an inert material and place in an appropriate waste disposal container. If necessary: Neutralize the residue with a dilute solution of sodium carbonate.

Large Spill and Leak
Stop leak if without risk. Absorb with DRY earth, sand or other non-combustible material. Do not touch spilled material. Prevent entry into sewers, basements or confined areas; dike if needed. Call for assistance on disposal. Neutralize the residue with a dilute solution of sodium carbonate.

Section 7. Handling and Storage

Handling
Do not ingest. Do not breathe vapor or mist. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

Storage
Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure Controls, Personal Protection

Engineering Controls
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective occupational exposure limits. Ensure that eyewash stations and safety showers are proximal to the work-station location.

Personal Protection

Eyes
Face shield. Splash goggles.

Body
Chemical resistant protective suit.

Respiratory
Be sure to use a MSHA/NIOSH approved respirator or equivalent. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product, and the safe working limits of the selected respirator.

Hands
Butyl rubber gloves. Neoprene gloves.

Feet
Boots.

Protective Equipment (Pictograms)

Personal Protection in Case of a Large Spill
Face shield. Splash goggles. Full suit. Boots. Gloves. A self-contained breathing apparatus should be used to avoid inhalation of the product. Suggested protective clothing might not be sufficient; consult a specialist BEFORE handling this product.

Section 10. Stability and Reactivity

Stable under recommended storage and handling conditions (see section 7).

Incompatible Substances
Reactive with oxidizing agents, alkalis. Cyanides. Hydrogen, a highly flammable and explosive gas, may be generated by the action of acids on many metals.

Hazardous Decomposition
In a fire: toxic sulfur oxides.

Hazardous Polymerization
Will not occur.

Section 11. Toxicological Information

Chronic Effects on Humans
CARCINOGENIC EFFECTS: Classified A2 (Suspected for human.) by ACGIH [SULFURIC ACID].
MUTAGENIC EFFECTS: None identified.
TERATOGENIC EFFECTS: None identified.

Special Remarks on Toxicity
Inhalation of the spray mist may produce severe irritation of respiratory tract, characterized by coughing, choking, or shortness of breath. This product contains less than 0.1% formaldehyde. Formaldehyde may cause sensitization and reduced vision. Lifetime study of rats exposed to formaldehyde gas indicated development of nasal cancers.

Any component listed in this section that is not listed in Section 2 is present in the product in concentrations below legal disclosure limits (1% for hazardous components and 0.1% for carcinogens)

Section 12. Ecological Information

Enthone has not conducted specific studies on the ecotoxicity or environmental fate of this product.

Section 13. Disposal Considerations

Waste Information
Waste must be disposed of in accordance with federal, state and local environmental control regulations.

Section 14. Transport Information

DOT Classification 8
UN number UN2796
Proper shipping name SULFURIC ACID, SOLUTION
Packing Group II

This Transport Information applies only to the Product Code Number(s) listed in Section 1. Other container sizes may require different Transport Information. If assistance is required, contact Regulatory Affairs at 203-799-4936.

Section 15. Regulatory Information

U.S. Federal Regulations SARA 313 toxic chemical notification and release reporting: SULFURIC ACID
All ingredients comply with applicable rules or orders under TSCA

State Regulations
California prop. 65: None identified.

Any component listed in this section that is not listed in Section 2 is present in the product in concentrations below legal disclosure limits (1% for hazardous components and 0.1% for carcinogens).

Section 16. Other Information

Definition of Terms
ACGIH American Conference of Governmental Industrial Hygienists
