Section 1. Chemical Product and Company Identification

Product Name: MICROFAB® CU-300 STARTER
Product Code Number(s): 250828
250835-001
Material Uses: Specialty chemicals for the electronics and surface finishing industries.
Manufacturer: ENTHONE
350 Frontage Road
West Haven, CT 06516
(203) 799-4917
(203) 799-8179 (fax)
www.cooksonelectronics.com
Supersedes Date: NEW
Print Date: 10/15/2003.
Prepared by: Anton Mayer - Regulatory Specialist

Section 2. Composition, Information on Ingredients

All ingredients comply with applicable rules or orders under TSCA

Section 3. Hazards Identification

Physical State and Appearance: Liquid.
Odor: Acidic.
Color: Clear to Pink

Emergency Overview: DANGER!
May be fatal if swallowed. May cause burns to mouth, throat and stomach.

Routes of Entry: Dermal contact. Eye contact. Inhalation. Ingestion.

Potential Acute Health Effects:

- **Eyes**: Very hazardous in case of eye contact (corrosive). Inflammation of the eye is characterized by redness, watering, and itching.
- **Skin**: Very hazardous in case of skin contact (corrosive). Skin contact may produce burns. Skin inflammation is characterized by itching, scaling, reddening, or, occasionally, blistering.
- **Inhalation**: Very hazardous in case of inhalation (lung corrosive). Inhalation of the spray mist may produce severe irritation of respiratory tract, characterized by coughing, choking, or shortness of breath.
- **Ingestion**: May be fatal if swallowed. May cause burns to mouth, throat and stomach.

Medical Conditions Caused or Aggravated by Overexposure: Prolonged contact with skin, eyes, or respiratory tract may result in burns or tissue damage due to corrosive effects. Repeated or prolonged skin contact can cause drying and cracking of the skin (dermatitis).

Continued on Next Page
Section 4. First Aid Measures

**Eye Contact**
Check for and remove any contact lenses. In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Cold water may be used. Get medical attention immediately.

**Skin Contact**
In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately.

**Inhalation**
If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

**Ingestion**
If swallowed, do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention immediately.

Section 5. Fire Fighting Measures

**Flammability of the Product**
Non-flammable.

**Flash Points**
Not applicable.

**Products of Combustion**
This material is not combustible, however in a fire it may give off sulfur oxides (SO2, SO3...)

**Fire Fighting Media and Instructions**
Use DRY chemicals, CO2, water spray or foam.

**Protective Equipment (Fire)**
Wear NIOSH approved self-contained breathing apparatus or equivalent and full protective gear.

**Unusual Firefighting Hazards**
May react with amphoteric metals (such as aluminum, zinc, tin) generating hydrogen gas which will burn or explode if ignited.

Section 6. Accidental Release Measures

**Spill or Leak**
Wear protective equipment, see Section VIII. Stop leak if without risk. Prevent entry into sewers, basements or confined areas; dike if needed. Absorb with an inert material and place in a plastic lined DOT approved waste disposal container. Dispose of according to all federal, state and local applicable regulations.

Section 7. Handling and Storage

**Handling**
Do not ingest. Do not breathe vapor or mist. Keep container closed. Use only with adequate ventilation. Wash thoroughly after handling.

**Storage**
Keep container tightly closed. Keep container in a cool, well-ventilated area.

Section 8. Exposure Controls, Personal Protection

**Engineering Controls**
Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapors below their respective occupational exposure limits. Ensure that eyewash stations and safety showers are proximal to the work-station location.

**Personal Protection**

- **Eyes**
  Face shield. Splash goggles.

- **Body**
  Chemical resistant protective suit. Additional body garments should be used based upon the task being performed (e.g., sleevelets, synthetic apron, gauntlets) to avoid exposed skin surfaces.

- **Respiratory**
  Use NIOSH approved respirator when air concentration is greater than the TLV or PEL. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product, and the safe working limits of the selected respirator. Employers must ensure that employees are properly fitted and trained in the use of respiratory and other personal protection equipment. Employers must assure through industrial hygiene monitoring, engineering control and the selection of proper personal protection equipment that employees working with or around this product are not exposed to contaminant levels above those allowed by OSHA 29 CFR 1910.

- **Hands**
  Impervious gloves. Neoprene gloves.

- **Feet**
  Boots.

Section 9. Physical and Chemical Properties

Physical State and Appearance: Liquid.
Odor: Acidic.
Color: Clear to Pink

pH: <1 [Acidic.]

Boiling Point: 100 °C
Melting/Freezing Point: 0 °C
Specific Gravity: 1.062 (Water = 1)
VOC: Not applicable.
Solubility: Soluble in cold water, hot water.

Section 10. Stability and Reactivity

Stability and Reactivity: Stable under recommended storage and handling conditions (see section 7).

Incompatible Substances: Reactive with oxidizing agents, alkalis. Cyanides. Hydrogen, a highly flammable and explosive gas, may be generated by the action of acids on many metals.

Hazardous Decomposition Products: In a fire: toxic sulfur oxides.

Hazardous Polymerization: Will not occur.

Section 11. Toxicological Information

Toxicity Data

Chronic Effects on Humans: CARCINOGENIC EFFECTS: Classified A2 (Suspected for human.) by ACGIH [SULFURIC ACID].
MUTAGENIC EFFECTS: None identified.
TERATOGENIC EFFECTS: None identified.

Special Remarks on Toxicity: Workers exposed to sulfuric acid mist showed a statistical increase in laryngeal cancer. This data suggests a possible relationship between carcinogenesis and inhalation of sulfuric acid mist.

Any component listed in this section that is not listed in Section 2 is present in the product in concentrations below legal disclosure limits (1% for hazardous components and 0.1% for carcinogens).

Section 12. Ecological Information

Enthone has not conducted specific studies on the ecotoxicity or environmental fate of this product.

Section 13. Disposal Considerations

Waste Information

Waste must be disposed of in accordance with federal, state and local environmental control regulations.

Section 14. Transport Information

DOT Classification 8
UN number UN3264
Proper shipping name CORROSIVE LIQUID, ACIDIC, INORGANIC, N.O.S. (SULFURIC ACID)
Packing Group II
Special Remarks on ERG #154
Transportation Information

This Transport Information applies only to the Product Code Number(s) listed in Section 1. Other container sizes may require different Transport Information. If assistance is required, contact Regulatory Affairs at 203-799-4936.

Section 15. Regulatory Information

U.S. Federal Regulations
SARA 313 toxic chemical notification and release reporting: SULFURIC ACID
All ingredients comply with applicable rules or orders under TSCA
State Regulations
California prop. 65: None identified.

Any component listed in this section that is not listed in Section 2 is present in the product in concentrations below legal disclosure limits (1% for hazardous components and 0.1% for carcinogens).

Section 16. Other Information

Other Special Considerations
Enthone recommends that employers develop, implement, and train all employees in proper workplace safety procedures and practices as contained in OSHA 29 CFR Part 1910 (Occupational Safety and Health Standards).

Definition of Terms
ACGIH American Conference of Governmental Industrial Hygienists
Ceiling Maximum exposure limit defined by OSHA
CAS Chemical Abstract Service
IARC International Agency for Research on Cancer
NIOSH National Institute for Occupational Safety and Health
NTP National Toxicology Program
OSHA Occupational Safety and Health Administration
PEL Permissible Exposure Limit
REL Recommended Exposure Limit
RTK Right to Know
SARA Superfund Amendments and Reauthorization Act
STEL Short Term Exposure Limit
TLV ACGIH Threshold Limit Value
TLV-C ACGIH Threshold Limit Value, Ceiling
TRADE SECRET Claimed as allowed under 29CFR§1910.1200
TSCA Toxic Substances Control Act

Disclaimer
